

Our Online Social Community is Here!

Your member profile is now a gateway to connect and engage with other members of our community. Some of the new features of our website include:

- Similar to Facebook™ friends or LinkedIn™ connections, you can now form connections with your friends and colleagues.
- Create albums and upload photos to your profile to share with other members.
- Status messages give you a way to share what you're working on with other members.
- Profiles have a “wall” where connections can leave messages for each other.
- Join circles for special interest and discussion groups. You can create photo albums within Circles too!

To get started:

1. Log into your profile.
2. Upload a profile picture or edit your existing one.
3. Make connections with friends and colleagues.
4. Create or join a Circle to engage in special interest groups.
5. Send private messages to one or more members at a time.
6. New privacy settings allow you to control who has access to each area of your profile.

Learn more about these new features by watching this short video:
